JEFF,

Yes, that sounds fine. If we decide it's too loud, we'll leave. No worries. I'll let my son who at times goes over to limit his visits.

Mrs. Gaytan:

During the entire time we are there, we will be constantly monitoring dust levels in the air and taking dust control measures especially at the perimeter of the site. If you are feeding your animals at 7-8 o'clock at night, you should be under no higher risk than you are now.

The security guard will arrive Monday and will be on site from approximately 6 pm to 7 am, covering the hours that we aren't working.

My concern for you and your husband are mainly the noise of heavy equipment and workers and heavy traffic. This is going to be inconvenient for you. I'm sorry for that and I will do what I can to minimize that inconvenience.

Respectfully,
Jeffrey Fowlow

Jeff,

Simon said he can feed the animals after 7 - 8 pm. He doesn't like leaving the property for 5 days. Do you think the dust will settle by 7 or 8 pm? For now only Simon and I live here till August 24 th. Then my nephew and his family will move in. You said a security person would be there. We just don't know what hours they will be there. Can you let us know? I guess we will decide after you answer.

I just need to know if we will be in harm's way if we stay. And what about the animals?

Sandra L. Gaytan

Mr. Beattie:

Please let me know if all communications to Mr. and Mrs. Gaytan need to still go through you.

Mrs. Gaytan:

Thank you for the consent for access to your property beginning Monday, August 12. EPA and EPA contractors will begin arriving at the property around noon Monday. We will begin receiving and setting up equipment and getting ourselves oriented around the property. I expect our normal working hours to be approximately 7:00 AM and to 6:00 PM, although we tend to arrive a little early and our work keeps us there after hours.

I have a couple questions:

- We spoke about whether you will be away from the property during the 5 days we are working. Have you decided whether you will do that?
- How many people live at the property? (I am trying to gauge the amount of traffic and vehicles that will be coming and going.)
- Do you have a set schedule for feeding your livestock? (I want to make sure we are aware of it and accommodate your schedule.)

There may be other questions that come up. If you have any questions for me, please call or email or route the questions through your attorney.
